

Name: Faiaz Hossain Chowdhuri

Age: 23

Email: [faiazhossainchowdhuri@gmail.com](mailto:faiazhossainchowdhuri@gmail.com)

1) What do you do?

Ans: I was in a job, I just resigned recently. I am basically a software engineer.

2) Which company did you work for?

Ans: I worked for Bay Innovations Limited.

3) Do you have any experience in teaching students?

Ans: Yes, I have the experience of being a private tutor/ home tutor for 2 years from 2014 to 2016.

4) What are the subjects you usually taught?

Ans: The common subjects I used to teach were Maths, Add-Maths, Physics, Chemistry and occasionally History and Geography.

5) What's your point of view on using mobile phones for teaching? Have you ever used a mobile phone for teaching?

Ans: No I have not done that, I did not feel the need to use mobile phones/ smart phones to connect with my students. I did check up on my students using messenger and phone class. Other than that, no.

6) What is your preferred teaching material?

Ans: I always preferred books as my preferred teaching material. This is because it was easier for me to follow up on the syllabus that had been given from school. I also used question papers and mark schemes.

7) Have you ever faced any issue while teaching your student the science subjects from the book?

Ans: I did face some issues but I don't exactly remember them, but whenever I used to face these sorts of issues I would tell my students that I will get back on the topic in the next class. After I went home for the day I used to do some research of my own on the topic from the internet and try explain the topic in more detail the next class.
