

Name: Mahreen Afree

Age: 23

Email: tushtiahmed@gmail.com

1) What do you do?

Ans: I'm a private tutor.

2) How long have you been teaching students? How many students did you teach and what classes did they belong to?

Ans: I have been teaching for 3 years. I have taught four students so far. They belong to fourth grade, seventh grade and tenth grade.

3) Which student did you enjoy teaching the most and why?

Ans: I enjoyed teaching the tenth grade one the most because it is less laboursome.

4) What subjects did you usually teach?

Ans: I mostly taught Physics, Chemistry, Biology and Maths.

5) Which teaching material did you prefer?

Ans: I always recommended my students to read the test books. Also sometimes I use google.

6) Did you face any challenges while teaching you students?

Ans: In my experience I faced challenges while teaching chemistry because the students seemed to forget the chemical equations for different chemical compounds. Sometimes the pictures in the books were not clear enough. That's why I used google to give my students more vivid descriptions of the pictures, for instance I used google to show my students the colour of chemical compounds before and after a reaction has taken place.

7) What smartphone do you use?

Ans: Xaomi.

8) Have you ever taught any of your students online?

Ans: No.

9) Did you use any other device other than smartphones to teach your students?

Ans: No.
